### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/12/2006, (resubmitted 12/11/2006) has been entered.

### ***Allowable Subject Matter***

2. Claims 5-8 are allowed.

### ***Reasons For Allowance***

3. The following is an examiner's statement of reasons for allowance: The prior art of record, either alone or in combination, fails to teach, suggest, or render obvious the combined limitations of the independent claim.

4. In particular, the prior art of record fails to disclose a CGI (Common Gateway Interface) script where instructions/parameters related to the display of content obtained or generated from the CGI script instructions are maintained in separate files (termed "display control files") which are stored/maintained separately from the CGI script. A user then makes a selection from the web browser (e.g., clicks a hyperlink, icon, button) where each of the selections has embedded in its HTML tagging settings that name and

configure which of the separate display files is to be used to display content obtained or generated by the CGI scripting.

5. The prior art typically requires a user to alter a single CGI script to accommodate each type of desired display (which, for web sites with hundreds of pages calling CGI scripting, makes the CGI script lengthy and cumbersome to maintain), or write a separate CGI script for each different display (again, for sites with hundreds of pages calling CGI scripting the work required to maintain hundreds of CGI scripts is prohibitive). By defining separate display control files, each of which is called by the same CGI script, a designer can easily define new displays by simply creating a new display control file and does not have to understand CGI programming. This also eliminates the need to disable all CGI access while the single CGI script is edited to add new display capability leading to less downtime.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
